

# M.V.R

## Manganese, Vanadium and Rust Brick Stain Remover

GuardIT® M V R is a safe and simple to use Product. MVR is a safe alternative to harsh acids used in the removal of, Manganese, Vanadium and Rust stains.

No need for three different products to remove stains from bricks as, MVR removes all three most common stains, Manganese, Vanadium & Rust from bricks, concrete, sandstone, ceramic, terracotta, blue stone and other similar surfaces.

### Reasons to choose M.V.R

- Effective, replaces harmful acids
- Safe to use
- Non-dangerous goods
- Non-corrosive
- Phosphate free
- Readily biodegradable
- Non-fuming

# GUARDIT<sup>®</sup> to protect it

## Advanced Green Technology

GuardIT<sup>®</sup> MVR is highly effective in the removal of manganese, vanadium, rust and organic stains. A safe and easy to use product that quickly removes stains without the need to scrub. Simply apply onto stain and leave to do its magic, no need to rinse off.

GuardIT MVR removes stains from bricks, concrete and natural stone, it does not damage concrete mortar as it only attacks the offending stains.

## Safe to Use

GuardIT<sup>®</sup> MVR is a safe and simple product to use. Simply apply MVR to the stain using either a paint brush or 5mm Micro Fibre roller, no need to rinse off.
